Hugo Figueira

UI/UX Designer

March 26, 1992 - Évora (Portugal)

Hello!

My name is **Hugo** and I'm a **UI/UX Designer**, born and raised in Évora (UNESCO world heritage city, about 1h driving from Lisbon).

From an early age, I've been quite interested in Arts, Design, and Architecture, without even knowing that I would become a Designer years later.

I have graduated in **Design** at the **University of Évora**, with a focus on graphic and web design. Even before finishing my graduation I've started working on a business intelligence company, where I worked for two and a half years and acquired most of my knowledge and interest in **User Interface**, **User Experience**, and **HTML/CSS**.

After moving to Lisbon, I've started to work more closely with UX and Product Design, where I've been dedicating most of my working time at **Hitachi Vantara**.

In my free time, I try to travel as much as I can, and the rest of the time is spent around cars (cleaning, restoring, and driving them).

This is the short version of what I am!

In the next few pages, you will get to know a bit more about my background as a Designer and how I got here.

If I'm able to convince you to give me a change or if you want to know a bit more about me, you can get in contact using the info below.

Work

I've started my career even before graduating when a business intelligence company was brave enough to allow me to put my design skill up to a challenge.

And here I am. After that, my love for design accessible and user-friendly applications was growing better and faster than ever.

Discover below what was my path after that until today.

HITACHI
Inspire the Next

Sep 2017 - Present

Hitachi Vantara
Product Designer & UX Designer

www.hitachivantara.com

· Wireframe, prototype and design Hitachi core software applications;
· Research, design, develop and test Hitachi Design System patterns;
· Bridge between Design System and UI Kit teams;

pentaho

Jan 2017 - Sep 2017

Pentaho, A Hitachi Group Company
UX Designer

www.pentaho.com

· Design, mockup and prototype new features of the Pentaho core software applications;
· Usability Testing and User Research;

STAPLES

Dec 2015 - Jan 2017

Staples Europe
Web Designer

www.staples.eu

· Production of Web Assets (banners), Incentive and Retail Email and Web Landing Pages for 10 European markets across 6 media vehicles;
· Point of contact for all market Business Units and implementation teams of each one;

cortex

Aug 2013 - Nov 2015

Cortex Intelligence
UI / UX Designer

www.cortex-intelligence.com

· Design of SaaS platforms, such as BigPicture360® and "O Meu Negócio";
· Design and development of mobile apps, websites and digital media;
· Production of audio-visual media;
· Development of Cortex Intelligence™ branding.

Education

My background comes mostly from Arts education. My parents tried to make grow as a creative individual and I'm assuming LEGO was a big part of it when I was a child - probably that's where the love from Architecture came from.

Even though, before going to the University, I've decided to take Design instead, since it was a passion I've developed during High School - mostly tied to the user, like UI and UX.

Studies

Sep 2010 - Jul 2013

Degree in Design
University of Evora
Finished with 17 out of 20 points

- Web & Digital Design;
- Graphic Design and Design for Communication.

Workshops

Nov 2016 - Dec 2016

Advanced HTML5+CSS3
FLAG School, Lisbon

May 31st, 2013

Design Thinking
University of Evora, Evora

Jun 1st, 2013

Graphic Production
University of Evora, Evora

Feb 2012

Photography
Instituto Português de Fotografia, Lisbon

Jul 2010

StopMotion Technics and Video Shooting
University of Evora, Évora

MyGym app

Mobile app proposal | 2019

The **MyGym app** is a proposal for a local gym, designed by me and developed by me and some friends using React Native.

The proposal was to create a fully capable application that manages all the gym schedules and booking of classes within the app, making the booking system a bit less stressing, and more focused in the exercise.

It would also track the users health situation, in order to improve their lifestyle and achieve their desired goals.

This is still a work in progress of the v2.0 version.

CupPhone

Mobile app proposal - 2019

Inspired by the good old days, talking with our friends using walkie-talkies and cup phones (yes, that cutting edge tech using two cups and a string).

But now with a modern twist that allows anyone to connect to the world, with no language barriers.

We can see the analogy of the two cups (input/output) and the string represents the processing of the script (Artificial Intelligence & Machine Learning engines).

Portfolio

ti-ex

Website and brand activation - 2019

ti-ex is a physical activity management platform, focused on the most diverse individual sports (triathlon, cycling, swimming, running, gym, etc.).

It's connected to a global database with biometric, medical, nutritional and sports data, it allows simple and complete prescription and monitoring of training.

The goal of this work was to create and develop their website, so they could start collaborating with several teams and sports federations.

Visit on **www.ti-ex.pt**

Growmart

Website - 2018

Growmart is a professional placement and integration agency. Their commitment is mostly for people and agencies from different nationalities, creating job opportunities by brokering global recruitment companies with the Portuguese market, from the most traditional sectors to highly specialised sectors such as agriculture, livestock, metallurgy, construction, petrochemical, care and more.
